

Rigorous testing for
a brilliant product and
faster time to market.

At QASmartz we live and breathe testing. We have an experienced team of over 50 testing professionals and analysts and provide a complete range of testing services including Automation Testing, Manual Testing, Mobile QA, Performance Testing, Security Testing and API Testing.

WHY QASMARTZ?

A well equipped Testing Lab

At QASmartz we have a testing lab with over a hundred devices to cover most testing requirements.

50+ experienced, certified testing professionals

Our testers and analysts are completely immersed into testing techniques and tools and do a thoroughly expert job every single time.

Best practices and tried and tested processes

In general we follow the Agile methodology. If you get a dedicated testing team with us, we will completely integrate our work processes with your development team's so your project development and testing proceed smoothly in a synergistic manner.

Cost-effective testing

When we consult with you we will recommend the testing procedures that make sense not just technically but also from a financial point of view.

Fast turnarounds and quick time to market

Our turnaround time is one of the fastest globally and you can expect your product launch to be absolutely on schedule!

ENGAGEMENT MODELS

At QASmartz we provide two options of working with us.:

Build up a dedicated testing team

When you get a dedicated testing team with us, they will only handle your project and be available to test the solution on an ongoing basis in tandem with your development. In fact your project will zoom ahead at a scorching pace since testing will be continuously going on.

Opt for a service based engagement model

With this model, you can have several options - we can work with you on either a time-based or project-based schedule. We will understand your requirements and your product, make a testing plan with a proposed time estimate and work according to the schedule.

TESTING SERVICES

AUTOMATION TESTING

Our Automation Testing services provide a fast way to optimize development workflows, reduce time to market, and radically improve product quality while cutting costs.

MANUAL TESTING

Our manual testing ensures a cost-effective test cycle. This includes Core functional testing, GUI Testing, DB Testing, Usability testing, E2E testing, Browser compatibility testing, etc.

MOBILE TESTING

We offer comprehensive mobile testing services that make sure the mobile solution is actually delivering the expected business return and a smooth user experience.

PERFORMANCE TESTING

We will test to see how your product performs in terms of responsiveness and stability under a particular workload. We will measure and validate other attributes as well.

SECURITY TESTING

We will test your information systems to see if data is properly protected and functionality is maintained as intended. This includes elements of confidentiality, integrity, authentication etc.

API TESTING

We will test your application programming interfaces (APIs) directly and as part of integration testing to determine if they meet expectations for functionality, reliability, performance, and security.
